

TACAN LIST FOR MSFS 2020

Selection of Tacan to fly around France using

Additional Vector Option of the AzurPoly Jaguar A

I added some usefull Spanish, Italian, English, Belgian and German TACAN if you fly around the Alps, the Pyrenees and across the Channel.

My goal is to allow you to use this beautiful bird to it's full potential.

I present you a list of TACAN that will allow you to navigate around France without you even thinking of needing an INS, using the lovely additional vector function.
