

SWITCH BINDINGS FOR SWS RV-10

Circuit breakers

(A:CIRCUIT_BREAKER_PULLED:x, Bool)

- System index depends on aircraft, reference systems.cfg for exhaustive list

Lights

(L:LIGHTING_Switch_Light_WigWag, Bool): Flasher switch for landing lights

- 0 off
- 1 on

Flaps

(L:SWS_HANDLING_Switch_Flaps_UpCenterDown, Bool): It is recommended to use the default flap keybindings, as this switch emulates an increment/decrement position instead of the fine control the real RV-14 provides

- 0 up
- 1 centre
- 2 down

ELT

(L:Switch_ELT_RESET, Bool)

- 0 released
- 1 pressed

(L:Switch_ELT_ON, Bool)

- 0 released
- 1 pressed

Sunshade

(L:SWS_MISC_Sunshade_1, Number): Gradually increase from 0 to 1

- 0 retracted
- 1 extended
